

Texas School for the Deaf

Step-by-step instructions, talking points and screenshots for demonstrating all ten requirements on educationdemo.com.

Website: dotcms-demo-sites-45sr.vercel.app · **dotCMS:** awesomedemo-dev.dotcms.dev, site educationdemo.com

Prepared October 6, 2026 · Nuno Figueiredo, Solutions Engineering, dotCMS

Before the demo

Ten minutes of setup the day before, five minutes before the call.

What you'll use

What	Where
Public website	https://dotcms-demo-sites-45sr.vercel.app (Vercel, Next.js)
dotCMS	https://awesomedemo-dev.dotcms.dev/dotAdmin → site selector (top right): educationdemo.com
Demo context and rebuild	<code>~/headless/general demos /frontend-education/DEMO-CONTEXT.md</code> · <code>docs/build-education.py</code>
Demo passwords	<code>~/headless/general demos /docs/education-users.local.csv</code> — never paste them into chat, slides or a document

The cast

Log in as	Role	Can do
DANA Dana Reyes <code>contributor@educationdemo.com</code>	TSD Contributor	Edit any page and content; submit for review. No publish.
SAM Sam Ortiz <code>outreach@educationdemo.com</code>	TSD Outreach Editor	The same, but only the Statewide Outreach Center (<code>/outreach</code>): its page, sections, events and staff profiles.
MORGAN Morgan Lee <code>publisher@educationdemo.com</code>	TSD Web Publisher	Approve & publish, send back with a comment, publish pages and alerts.
ADMIN your own login	Administrator	Content Model (types, categories, workflows) and Settings (Apps, dotAuth, Plugins).

Use three browser profiles (or one normal and two private windows) so Dana, Sam and Morgan can stay signed in side by side. Labels like **SITE** in the steps say which window to use.

Checklist

- ☐ Open the website home page; check the blue information alert is there (it runs until October 31).
- ☐ Sign in as Dana, Sam and Morgan in separate windows; select **educationdemo.com** in each.
- ☐ In Morgan's window, open *Content* → *Search* → *TSD Alert* and find the draft "Campus closed today due to winter weather" — you'll publish it in Requirement 10.
- ☐ Optional: open `/staff`, `/resources` and `/calendar` once, so the first load during the call is fast.
- ☐ Browser zoom 100–110%; close notifications.

Suggested agenda (45 minutes)

Min	Segment	Requirements
0–3	The site: TSD brand, real content	—
3–11	Building pages, design and social media	6
11–19	Calendar, news, staff directory, knowledge base	2, 3, 8, 9
19–24	Emergency alerts	10
24–36	Approval workflow, permissions and accessibility enforcement	4, 5
36–41	Analytics and SSO	1, 7
41–45	Questions	

The sections below follow this order; each is labelled with its requirement number.

The site

3 minutes · SITE

- 1 Open the home page. Point out it's TSD's real brand (seal, navy and pink, Libre Baskerville), copy, photos and phone numbers — built on dotCMS as a headless site with a Next.js front end.
- 2 Scroll: hero, quick links, *Discover TSD* program cards, the 170th-anniversary carousel (it has a pause button), latest news beside upcoming events, Follow TSD, the mission statement.
- 3 Open the **Academics** menu: each school has its own page.
- 4 Shrink the window or open it on a phone: the layout adapts.

Latest news beside upcoming events on the home page.

The home page on a phone.

TALKING POINTS

- Every page and component you see is content in dotCMS; the developers built the components once, editors assemble pages.
- Accessibility is built into the design system: contrast-checked colours, visible keyboard focus, a skip link, reduced motion respected. Editors can't break those.
- Videophone (VP) numbers sit beside voice numbers everywhere — for this audience, that's the primary way to call.

Contact Admissions

Admissions Office

Applications, campus tours for prospective families and registration

 VOICE	(512) 462-5412
 VP	(512) 782-4262

Campus Living, dorms and after-school activities

 VOICE	(512) 462-5601
 VP	(737) 334-3464

Contact cards on Admissions: voice, videophone and fax side by side.

REQUIREMENT 6

Design flexibility and social media

TSD asked for: “Design Flexibility, capability of editing all pages and all aspects of a page, design components and social media extensions such as YouTube, Instagram and Facebook.”

8 minutes · **MORGAN** in the editor, then **SITE**

Build and edit a page

- 1 **MORGAN** Site → Pages → open **Texas School for the Deaf** (the home page). The Universal Visual Editor shows the real site; the left palette lists only TSD components (the TSD Sections container keeps other demos' types out).
- 2 Click the headline “Learn. Grow. Belong.” and type: text edits in place and saves as a draft.
- 3 Drag a **TSD Callout** or **TSD Feature Grid** from the palette onto the page; fill in its form.
- 4 Select the *Discover TSD* grid and open its **Style editor**: change columns to 2, card style to Filled, alignment to Centered. No developer, no code change.
- 5 Point to the device buttons above the page (desktop, tablet, phone) to preview layouts.

The editor as Morgan: TSD components on the left, inline editing on the page, the accessibility box at the bottom right, and alert banners previewing above the header.

Style editor options exist for five components: Hero (text position, height, overlay), Page Banner (background, alignment), Feature Grid (columns, card style, alignment), Feature Split (photo shape — rounded, square, arched — and width) and Callout (alignment, size).

Header and footer too

- 1 **MORGAN** *Content* → *Search* → **TSD Site Settings** → open *educationdemo.com settings*.
- 2 Show the fields: top bar links, social media links, address, phone, videophone, two footer columns — all **Label | link** lines.
- 3 Add a line to *Footer column 2*, publish, refresh the site: it's in the footer of every page. The main menu comes from the dotCMS folders (Site → Browser, "Show on menu").

TSD Site Settings: everything outside the page body is editable.

YouTube, Facebook and Instagram

- 1 **SITE** **Outreach Center** page → the *ASL Storytelling* section: a real video from the Statewide Outreach Center's YouTube channel, badged **Signed in ASL**. Press play.
- 2 Home page → **Follow TSD** → *Show Facebook posts* and *Show Instagram posts*: TSD's live Facebook page and Instagram profile.
- 3 Point out that nothing loads from YouTube, Facebook or Instagram until the visitor chooses — no third-party tracking by default on a state agency site. The video's thumbnail is served by the site itself.
- 4 **MORGAN** Drag a **TSD Video** onto a page, paste a YouTube link and leave the accessibility boxes empty → Publish is refused (see Requirement 5). Tick *Signed in ASL* or *Captions* → it publishes.

ASL STORYTELLING

ASL Storytelling: Duck at the Door

Our storytellers bring picture books to life in American Sign Language, for classrooms and families across Texas.

The ASL Storytelling library has dozens of stories, from Aesop's fables to Peter Rabbit.

Signed in ASL

TSD Video on the Outreach page: loads on Play, from youtube-nocookie.com.

Facebook

Open on Facebook

Instagram

Open @texasschoolforthe deaf on Instagram

TALKING POINTS

- 16 components, each with fields editors understand; the same components appear on every page, so the site stays on-brand.
- Captions or ASL are required before a video can go live — at a school for the Deaf, an uncaptioned video leaves out its own community.

REQUIREMENT 2

Calendar with categories

TSD asked for: "Calendar system capable of separating events into different categories."

3 minutes · **SITE** , then **ADMIN**

- 1** **SITE** **Calendar:** 16 events grouped by month, each with colour-coded categories. An event can be in several (ACT Test is Testing *and* Academic).
- 2** Click **Athletics**: only the two games. The address becomes `/calendar?category=tsd-athletics` — shareable in a newsletter.
- 3** Click **Subscribe to Athletics events**: it adds a calendar that stays up to date in Google, Outlook or Apple Calendar. Each event also has *Add to calendar*.
- 4** Outreach page → *Upcoming Outreach events*: the same component, limited to the Outreach category by the editor.
- 5** **ADMIN** *Content Model* → *Categories* → *TSD Event Categories*: editors add or rename categories here; no developer.

Upcoming events

10 AM – 12 PM • Online • Family • Outreach

An Event List scoped to Outreach on the Outreach page.

Real vs sample: the ACT and end-of-course dates are from tsd.texas.gov; conferences, retreats, breaks, games and the dorm festival have sample dates.

REQUIREMENT 3

News and announcements with categories

TSD asked for: “News/Article system to announce to the site, also capable of separating into different categories.”

3 minutes · **SITE**

- 1 **News:** the pinned announcement “Celebrating 170 Years: Legacy in Action” leads the list (and the home page).
- 2 Click **The Roots** or **Lone Star Journal**: filtered, with a shareable address and an RSS feed for that category.
- 3 Open “Leading TSD into the National Spotlight”: its category chips link back to the filtered list.
- 4 Academics page → *Academics news*: a News List limited to one category.
- 5 In dotCMS, a TSD News item has *Categories* (TSD News Categories tree) and *Pin to the top of news lists*.

News with category filters; the pinned announcement first.

12 / 24

REQUIREMENT 8

Faculty directory and profiles

TSD asked for: “Faculty Directory and faculty profiles (profiles not required but would be a bonus).”

3 minutes · **SITE** , then **SAM**

- 1 **SITE** Home → **Staff Directory** quick link → `/staff` : everyone A–Z by last name, with e-mail, voice and VP.
- 2 Type **spanish**: the four staff who also speak Spanish. Type **tomas**: finds Tomás (accents ignored).
- 3 Click **Statewide Outreach Center**: three people; the address is shareable.
- 4 Open a profile: photo or initials, job, department, contact, languages, office, bio.
- 5 **SAM** Edit Emily Sanders’s job title → submit for review: department editors keep their own team’s profiles current. Open Maria Delgado (Admissions): read-only for Sam.

The directory filtered to the Statewide Outreach Center.

A staff profile at `/staff/tsd-staff-tomas-reyes` .

“Meet the Outreach team” on the Outreach page — the same component, one department.

Sample people: the 20 staff are fictional, in TSD’s real departments, with `@educationdemo.com` e-mail and 555-01xx numbers, and no photos. Say so if asked; real data would come from HR.

REQUIREMENT 9

Documentation knowledge base

TSD asked for: "Documentation knowledge base."

3 minutes · SITE

- 1 **Resources** (main menu): 12 entries — handbooks, policies, how-to-apply, tours, weather closures, transcripts, videophone contacts, Campus Living, two staff guides.
- 2 Search **weather** or **transcript**; choose *Show resources for: Staff*; click the **Policies & Governance** topic.
- 3 Open **Board Policy FD: Admissions and Enrollment**: the real PDF from TSD, stored in dotCMS's media library — *Download (PDF, 11 pages, 227 KB)* — with *Last reviewed*, owner office and audience.
- 4 In the editor, entries not reviewed for a year show **Review overdue**.

The screenshot shows a search interface for a documentation knowledge base. At the top, there is a search bar labeled "Search resources" with the text "weather" entered and a clear button (X). To the right of the search bar is a dropdown menu labeled "Show resources for" with "Everyone" selected. Below these are several topic filters: "All", "Admissions & Enrollment", "Handbooks", "Policies & Governance", "Health & Safety", "Student Life", "Visiting TSD", and "Accessibility". A "Staff Resources" filter is also present. Below the filters, it says "1 of 12 resources". The first resource is titled "Inclement weather and school closures" and includes a brief description: "Closures are announced in the alert banner on this website and through Residential Supervisors and principals. Missed days may be made up on the calendar's inclement weather days." Below the description, it shows a tag "Health & Safety", the audience "For Families, Staff, Students", and the review date "Reviewed September 2026".

The knowledge base: search, audience menu, topic filters; each entry shows its type and last review.

LAST REVIEWED
July 2026

KEPT UP TO DATE BY
A. Johnson, TSD Director of Admissions

The full policy is attached. For how it works in practice, see [How to apply to TSD](#).

← [All resources](#)

A document entry: the summary answers the question without opening the PDF.

TALKING POINTS

- Every entry has an owner office and a review date, so outdated documentation is visible instead of silently wrong.
- The summary is required: key information lives in accessible HTML, not only inside a PDF.

REQUIREMENT 10

Emergency alerts

TSD asked for: *“Emergency Alert (may or may not be required later on but having it would be awesome).”*

5 minutes · **SITE** and **MORGAN**

- 1 **SITE** Point to the blue **information** alert above the header (Family Weekend Retreat). It can be dismissed for the visit.
- 2 **MORGAN** *Content* → *Search* → *TSD Alert* → open the draft **Campus closed today due to winter weather**.
- 3 Show the fields: headline, message, severity (Emergency red · Closure amber · Information blue), link, *ASL video link* (adds “Watch in ASL”), starts, ends, every page or home only.
- 4 Set **Starts** to now and **Ends** to tonight → **Publish**. Refresh the site: the amber banner is on every page.
- 5 Change severity to **Emergency** → publish: red, announced immediately to screen readers, and can’t be dismissed.
- 6 End it: **Archive** it, or let it expire — dotCMS unpublishes it at its end time by itself.

An information alert above the header on the live site.

Published

Nuno Figueiredo

10/6/2026 1:07PM

The TSD Alert form, with the workflow panel on the right.

After the demo: archive or unpublish the closure alert (see “Resetting after the demo”). Never leave an Emergency alert published on the demo site — visitors would take it for real.

Staff permissions, page approval and SSO

TSD asked for: “Staff Management Permissions like an approval workflow for webpages, restricting page access and SSO sign-in for staff users” · “Security such as the SSO Sign-in for staff users.”

7 minutes · **DANA** , **SAM** , **MORGAN**

The approval workflow: TSD Page Approval

Draft → **Submit for review** → In Review → **Approve & publish** (or **Send back** with a comment) → Published.
Editing a published item puts it back in Draft.

- 1** **DANA** *Site* → *Pages* → Admissions (or any page). Edit a heading in place. Note the top-right button says **Save** — contributors have no Publish.
- 2** Click the section's edit (pencil) → the form's workflow panel shows **Save** and **Submit for review** only → Submit for review with a comment.
- 3** **SITE** Refresh the public page: unchanged. Nothing goes live without approval.
- 4** **MORGAN** Open the same page in the editor → the section's pencil → **Approve & publish**, or **Send back** with a note. Publishing the whole page also takes its waiting sections live in one step.

Dana submits for review with a comment. Her actions: Save and Submit for review — no Publish.

Restricting access by department

- 1** **SAM** Open the **Outreach Center** page: editable — its sections, events and staff profiles live in the `/outreach` folder, where Sam has edit rights.
- 2** Open **About** or **Admissions**: read-only. Department editors can't change other departments' pages.

SSO (walkthrough)

- 1 **ADMIN** *Settings* → *dotAuth*: SAML 2.0 and OAuth / OpenID Connect sign-in for staff, per site.
- 2 Explain the setup with TSD's identity provider (Microsoft Entra ID or Google Workspace): dotCMS generates its service-provider metadata; the IdP's metadata comes back into dotCMS.
- 3 Staff then sign in with their school account (MFA and password policy enforced by the IdP); disabling them in the IdP removes CMS access.
- 4 IdP groups can map to these roles, so who-can-publish is managed where HR manages staff. *Check the role-mapping settings in the dotCMS SAML documentation before presenting this step.*

Not connected: SSO is configured as a walkthrough only; no identity provider is attached to the demo.

REQUIREMENT 5

Accessibility enforced in approval

TSD asked for: “Accessibility enforcement site-wide during web page or article/news approval process.”

5 minutes · **DANA** , then **MORGAN**

- 1 **DANA** Elementary page in the editor → open the **Supplies for the new school year** section → clear its *Image description (alt text)* → Save. The **accessibility box** at the bottom right turns red: “1 accessibility problem to fix”, with the explanation.
- 2 **Submit for review** → refused by dotCMS with the exact problem and how to fix it. Nothing is saved.
- 3 Type a description (e.g. “The word Elementary in chalk-style letters under a shooting star”) → the box goes green → submit goes through.
- 4 In a news article’s body, add a Heading 1 or a “click here” link → submit → refused, each problem listed.
- 5 **MORGAN** Even publishers are held to it: publishing a page whose waiting sections fail is refused too, so a page never goes half live.

The editor’s accessibility box, from the same rules the workflow enforces. Dana’s top-right button is Save, not Publish.

Error

- Accessibility check: fix 1 problem in "Supplies for the new school year" first.
 - Image description (alt text): The image has no description. Describe what it shows (or the text it contains) for people who can't see it.

Close

Submit for review refused: the Check accessibility step stops the action and says what to fix.

What the check enforces

Rule	WCAG	Blocks
Every image needs a description, and not a file name like <code>IMG_1234.jpg</code>	1.1.1	Yes
Buttons and links need text that says where they go — not “click here”, “here”, “read more”	2.4.4	Yes
Rich text: no Heading 1 (the page title is), no skipped levels, images with alt text, meaningful links	1.3.1	Yes
Videos captioned or signed in ASL; a promised transcript must exist	1.2.1, 1.2.2	Yes
“Image of...” descriptions, very long descriptions, long headings in capitals	—	Warning

TALKING POINTS

- Accessibility isn’t a checklist people may forget: it’s part of publishing, for every editor and every page, news article and alert.
- The check is a dotCMS Java plugin (OSGi), deployed at runtime without restarting dotCMS — the same way TSD could add its own rules.
- On the first run it found two real problems in content we had built ourselves — an image without a description and a “Read more” button.
- Colours, contrast, focus and keyboard use are handled by the design system, so editors can’t break them.

REQUIREMENT 1

Analytics

TSD asked for: *"Analytics capability either built in or extensions via Google Analytics."*

3 minutes · **ADMIN** and **MORGAN**

Built in: dotCMS Content Analytics

- 1 **ADMIN** *Settings* → *Apps* → *Content Analytics* → *educationdemo.com*: enabled with page views, content impressions and clicks.
- 2 Explain what it adds over page views: for every component on a page, whether it was seen and clicked — which sections work, not just which pages.
- 3 Tracking turns itself off inside the editor, so editors' visits don't count.

Extension: Google Analytics 4

- 1 **MORGAN** *TSD Site Settings* → **Google Analytics measurement ID**. Paste a GA4 ID (G-...) and publish: GA loads on the next page view, no deploy. Clear it to switch GA off.
- 2 GA never loads in the editor's edit or preview modes.

Status: both are built. Content Analytics needs the analytics service's admin user and password entered once in the app before events are stored, and no GA4 ID has been set yet. Until then, present this as configuration rather than live dashboards.

Resetting after the demo

- ☐ **MORGAN** Archive or unpublish the **Campus closed** alert, then recreate a draft for next time (or rebuild — see below). Make sure no Emergency alert is published.
- ☐ Undo text you edited (the History tab of each item lets you bring back a previous version).
- ☐ Remove sections you dragged onto pages, and reset Style editor changes.
- ☐ Restore any image description you cleared in Requirement 5.
- ☐ Leave Emily Sanders's and other staff profiles as they were.

Known limits

Limit	What to say
Staff roles can't create brand-new pages	Publishers and administrators create pages; staff edit and add sections. (The shared Page type's permissions can't be set by API on this instance.)
Sam can create an item outside <code>/outreach</code>	He can't edit or submit it afterwards, so it never goes live.
Sample content	Staff are fictional; some calendar dates and the 170th-anniversary announcement are sample content; everything else comes from tsd.texas.gov .
SSO and analytics	See Requirements 7 and 1: walkthrough and pending credentials.

Rebuilding from scratch

`docs/build-education.py` recreates the site: content types, category trees, container, templates, pages, news, events, staff, resources, alerts, roles, workflow, demo users and the accessibility plugin (build the jar first with JDK 25 + Maven in `osgi/tsd-accessibility-check`). It refuses to run on a site that already has pages.
